LUNA PANEL INSTALLATION STEPS

（After final painting or wallpaper stage）
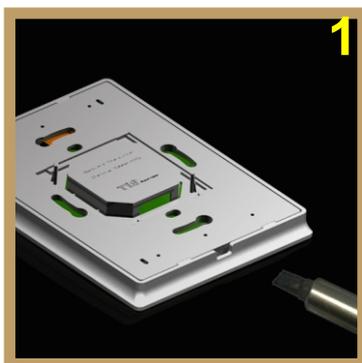

1 Use big flat head screwdriver then insert it in the Panel Cover down opening hole.
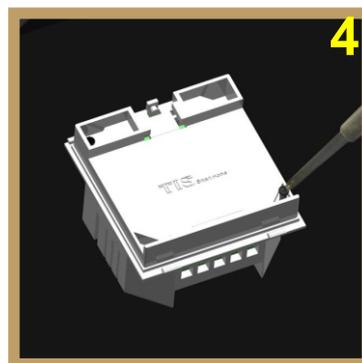

4 Open the 2 screws on the Panel Addition cover.
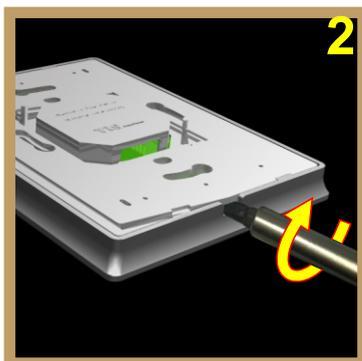

2 Rotate the screwdriver by 90 degrees.
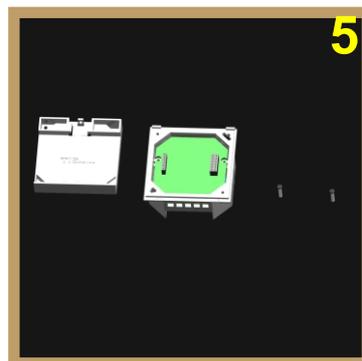

**5** Don't throw these screws or the cover as you will need it later

3 Separate the Cover, Main Panel and Wall base from each other
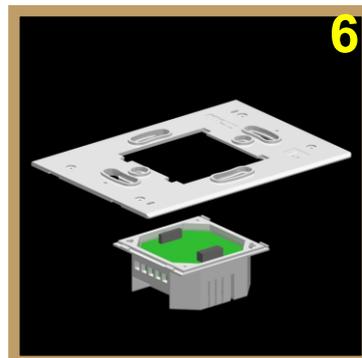

**6** Take the wall base and Panel Addition in this correct position for connection
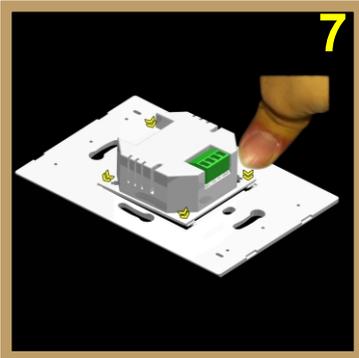

7 Assemble the upper pins than push by your fingers the down pins to assemble it fully
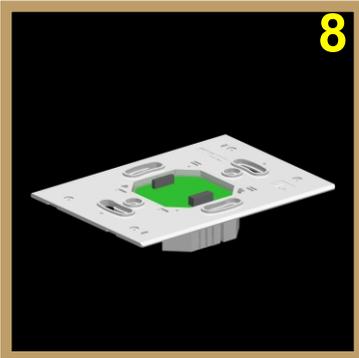

8 This should look like that after the correct assembly
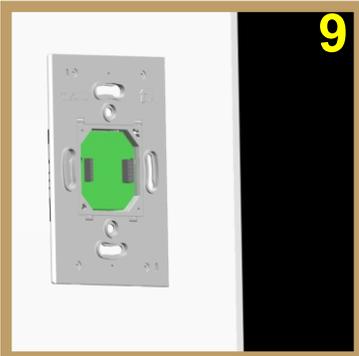

9 Connect the wires to the panel addition then Install this assembled part in the wall
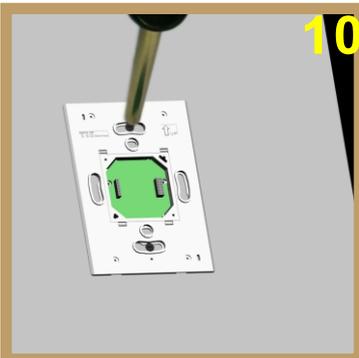

10 Tight the screws to the back box screw holes (can be installed in US back box, UK back box and Europe back box).

11 Pull by your fingers this Protective Plastic Cover vertically, remove it and throw it.
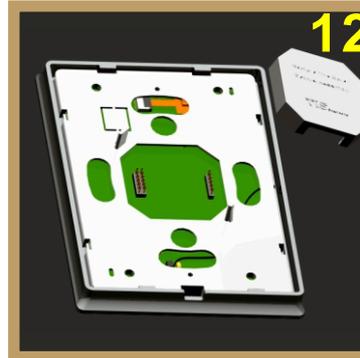

**12** This should look like after you remove the Protective Plastic Cover.
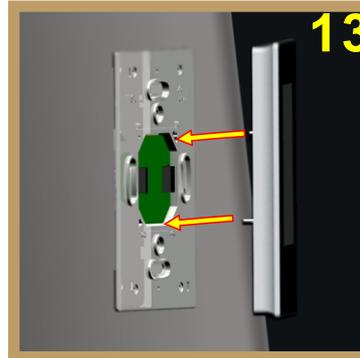

13 Connect the main Luna panel vertically to the other installed part in the wall

14 install the upper part make sure the buckles totally inside than push it from down side to be fixed on wall
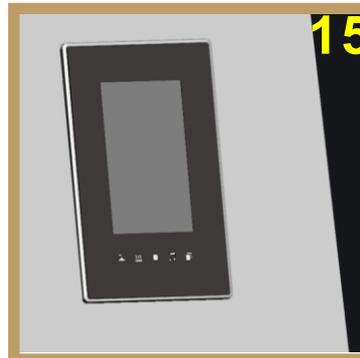

15 Assembly done.
