It's time for smart living

Looking for something to robust your interior design?

Luna 9G is an eye catching product from TIS smart home manufacturers, crafted to complement your interior design with its minimalist shape but outstanding function. The most significant feature of this device is that because of its coupler -a unique TIS-specific electrical piece- there is no need to have all the classic wiring for light switches distant from the electrical box; Luna 9G is capable of controlling the lighting system in your room.

You can convert all the light switches in your room into one single wiring panel Luna and save time and energy while enjoying the trendy technology. With its elegant shape and design, Luna 9G is available in Black and White with a touch screen including 9 buttons and a stylish LED. Its LED can be customized based on 265 color choices to create a magical and easy-to-find RGB backlit at night. Also, each of Luna 9G's buttons can perform different sets of commands if double clicked. So, there is a lot you can do with this fashionable panel.

Now it's time to
let one small device
make a big change
in your life.

At last, due to infrared capability of Luna 9G, it is possible to perform commands using a remote control. This option is of value to those who prefer controlling the home via button pushing instead of screen touching. The good news is Luna 9G with its practical functions can be favorable to everyone.

Furthermore, Luna 9G is capable of performing 9 scenarios. All you have to do is to **program your AC, lighting, curtain and audio systems** on this device and create your favorite scenes. For example, you want to spend your weekend watching animations with your kids. Assign an audio excerpt from "The Madagascar", set the living room lights to make a gleaming atmosphere, and have a surprise call for the kids with a lovely home theater.

You can easily lock Luna 9G's screen with a swipe of your fingertip. The unlocking process is done in the same way, also you can set a lock duration if necessary. This capability makes this device suitable for commercial and industrial use as well; hotel lobbies, restaurant and hospital settings are a few instances.

The logo for TIIS, featuring the letters 'TIIS' in a bold, white, sans-serif font. The letter 'I' is stylized with a vertical line through its center, resembling a dollar sign. The logo is set against a red rectangular background.
