INSTALLATION MANUAL TIS AIR SOCKET Model: AIR-Socket-S

E

Read Instructions

We recommend that you read this Instruction Manual before installation.

Mounting Location

Can be installed in any power outlet.

Safety instructions

Electrical equipment should only be installed and fitted by electrically skilled persons.

Failure to observe the instructions may cause damage to the device and other hazards.

These instructions are an integral part of the product and must remain with the end customer.

Electrical Wires

The installer should adequately consider the total current consumption when connecting any device.

Warranty

We provide a warranty as required by law. A hologram warranty seal and product serial number are provided on each device.

Please send the description of the defect with Product S/N to our dealer network.

Programming

This device can be tested and programmed manually. Advanced programming requires TIS Device Search software. Advanced software programming knowledge should be obtained in the advanced training courses.

Just plug it in to the power outlet.

Insert TIS AIR Plug in to the wall power outlet.

SERVER LINKING

In order for a project to be fully linked to the TIS server, server configuration must be enabled in just 1 product within that project.

If you have already done that with any other panel, just ignore these steps and proceed to configuration steps.

To do the server linking, complete the following steps:

1 ➤ In the TIS App, go to Settings ► Connect Server, and follow the steps by entering your SSID password.
